

Apple Ink-Jet Printer Supplies

To protect your investment in your ink-jet printer—and to make sure it delivers the highest-quality printing—equip it with genuine Apple ink cartridges, ink-jet papers, and film.

From reliable ink cartridges to brilliant specialty papers, Apple offers supplies designed to bring out the best in your ink-jet printer—and your work.

By selecting Apple supplies, you're sure to get the highest quality in every document you print.

It makes sense—to get the best out of your Apple printer, put genuine Apple printer supplies inside.

Ink cartridges

The ink cartridge used in your Apple printer is an important part of a complete printing system—a precisely engineered relationship between the ink, the print head, the printer engine, and the printer software.

Genuine Apple ink cartridges are designed to optimize the performance of this advanced printing system and ensure that it produces the print quality that you've come to expect from your Apple printer.

Whether you're printing in color or black and white, you'll consistently get cleaner whites, blacker blacks, richer graphics, and smoother printing by using Apple ink cartridges. They'll work with your printer to deliver exceptional printer performance and years of reliable, superior service.

Ink-jet papers and film

Apple high-quality ink-jet papers and films are specially formulated to produce breathtaking results with Apple ink-jet printers, as well as

with ink-jet printers from other manufacturers. With Apple papers, your printer will deliver more brilliant colors, sharper contrast, and crisper text.

From bright white clay-coated paper to photographic-quality heavyweight glossy paper, Apple ink-jet paper products dramatically enhance the quality of your output at a very reasonable cost.

And Apple transparency film lets you use your ink-jet printer to produce brilliant overhead presentation transparencies. Because Apple ink-jet inks dry very quickly, this transparency film works well—even when you need to make last-minute changes.

And if you own an Apple Color StyleWriter 2500, there's one more printer supply from Apple you need to know about. The Color StyleWriter 2500 Color PhotoGrade Print Kit lets you enhance your documents by including colorful images with true photorealistic quality. This kit unites a special ink cartridge and paper with a printer driver to provide images so compelling they have to be seen to be believed. And both the ink cartridge and the paper are also available separately, so you can keep on taking advantage of your Color StyleWriter 2500 printer's unique color imaging capabilities.

³ Apple ink-jet media work with many ink-jet printers from other manufacturers. These include the Canon BJC-210, BJC-600, BJC-600e, BJC-610, BJC-800, BJC-4000, and BJC-4100; Tektronix Phaser 140; and all Hewlett-Packard DeskJet and DeskWriter 500-series printers. The one exception is that Hewlett-Packard printers do not accept Apple Back-Print Film.

⁴ Media availability varies by country.

⁵ Note that paper size is A3.
