

We Have Five Senses. But It's Vision That Speaks The Loudest.

Apple Computer has always looked at things a little differently. We looked at computers in a new way twenty years ago, and sparked a revolution. It's our unique point of view that allows us to see individuals as a rich source of innovation.

We encourage a free exchange of ideas, and we're working hard to create the environment to fly them. This vision touches everything we do, from research and design to creating a benefits package that reflects the way people actually live.

Apple Computer is actively recruiting Human Interface professionals to join us in transforming that vision into great products with distinctly superior user value. We need Human Interface Designers, Visual Designers, and Human Interface Software Engineers. You must be creative, like to ship products, know and love the Macintosh, and work well in teams.

For more information on opportunities at Apple, you may send your resume to: Apple Computer, Inc., 1 Infinite Loop, MS 75-2CE, Dept. PS171, Cupertino, CA 95014. Or fax to: (408) 974-5691. Principals only, no phone calls, please.

Apple Computer has a corporate commitment to the principle of diversity. In that spirit, we welcome applications from all individuals.

⌘ N

Apple's Human Interface Designers transformed technology - they made the difficult easy for the rest of us. They changed the way the world looks at personal computers. They even changed the way Mac users look at their own creative potential. So it's no wonder other companies are trying to copy us. And it's no wonder that Apple's next interface will be revolutionary.

Why? Wildly creative designers with backgrounds in psychology, computer science, and graphic and industrial design. Applying that range of personal perspectives to the industry's most interesting problems. Listening to the needs of real human beings, from around the globe.

Where do you come in? We're looking for the most creative designers on the planet to help us build the future of computing. The next revolution might just be your own.

For more information on opportunities at Apple, you may send your resume to: Apple Computer, Inc., 1 Infinite Loop, MS 75-2CE, Dept. PSI91, Cupertino, CA 95014. Or fax to: (408) 974-5691. Principals only, no phone calls, please. Opportunities are also available in other areas.

Apple Computer has a corporate commitment to the principle of diversity. In that spirit, we welcome applications from all individuals.

Imagining it
is complex.

Using it
is simple.

Creating it is revolutionary.
