

Looking for a
compelling reason
to set up an
Internet Web site?
How about the
fact that you
don't have to be a
propellerhead
anymore in order
to actually do it?

Introducing the Apple Internet Server Solution.

It's called the World Wide Web (WWW). But that doesn't mean you have to get tangled up in it. Not with an Apple® Internet Server working for you. It represents the easiest, most affordable way for people to make their information widely accessible on the Internet. So virtually anybody can now create a WWW site—whether you work in education, publishing, a small business or a *Fortune 500*® company. It comes with all the software you need. Install it with a simple click of the mouse. You're up and running in minutes at less than half the cost (not to mention the headaches) of a typical UNIX®-based server. The sample Home Pages can even be customized. So you can build an interactive site full of hyper-linked text, graphics, video and sound. It also comes bundled with Adobe™ Acrobat Pro, allowing you to easily convert any PostScript™ file into a WWW-ready page. There are three Apple Internet Servers to choose from, all PowerPC™-based. Which means you can be sure you'll have the power necessary to respond to heavy WWW traffic. The power anybody can use.

The power to be your best.* **Apple** 

Call **800-538-9696, ext. 830**, and we'll send you a complete Apple Internet Server information kit. Or visit our WWW site at <http://abs.apple.com>.
